Florida Agricultural Statistics

Florida Department of Agriculture and Consumer Services
CHARLES H. BRONSON, Commissioner
The Capitol . Tallahassee, FL 32399-0800

Dear Floridians:

The Florida Department of Agriculture and Consumer Services in cooperation with the United States Department of Agriculture provides a yearly compilation of Florida agricultural statistics representing a board perspective of statewide production. This publication is made possible with assistance from thousands of dedicated agricultural producers who voluntarily contribute their valuable time to accumulate and provide basic data to us.

Agriculture remains a vital source of revenue and employment in Florida. It generates \$53 billion into the state's economy and provides employment opportunities for over 553,000 citizens of our state. The \$1.3 billion livestock component of Florida agriculture continues a successful path for the future based upon high productivity and efficiency. Florida industry can rely on these statistics to provide a foundation for developing planning, production, marketing and policy decision.

We appreciate those who have made this publication possible and thank them for their efforts.

Sincerely,

A handwritten signature in cursive script that reads "Charles H. Bronson".

ACKNOWLEDGMENT

This report is made possible through a cooperative effort of the Florida Agricultural Statistics Service, USDA, and the Florida Department of Agriculture and Consumer Services. Cover photo provided by the Florida Department of Agriculture and Consumer Services.

Many agricultural producers, associated allied industries, and government agencies associated with the livestock industry voluntarily supplied basic data used to develop these statistics. Their contributions are sincerely appreciated.

FLORIDA CASH RECEIPTS

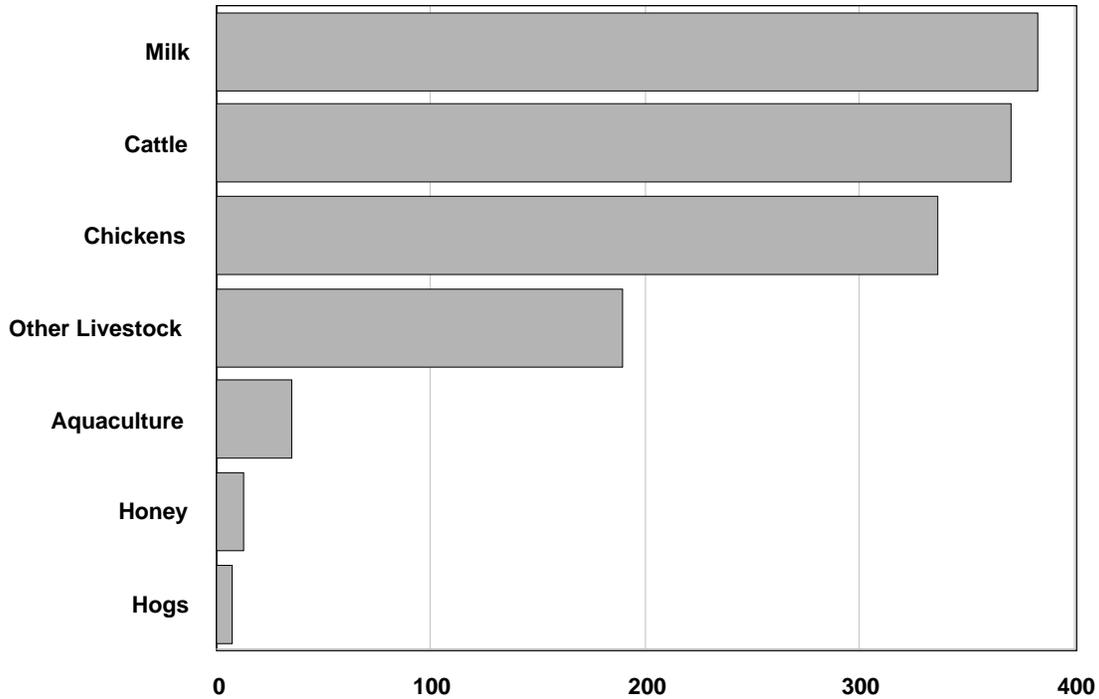

Florida's livestock industry had record gross receipts of \$1,378 million during 2000. This was an increase of \$17 million from receipts in 1999.

Milk sales at \$384 million remained the largest contributor to gross receipts. Receipts from milk sales were down from the 1999 receipts of \$412 million. Cattle and calf sales brought in \$371 million,

up from \$310 million of the previous year. Chickens and egg receipts in 2000 were \$336 million, of which broiler receipts accounted for \$226 million. 1999 chickens and egg receipts were \$355 million.

Honey receipts were \$13 million and aquaculture receipts were \$35.8 of which catfish receipts were \$1.3 million. Hog receipts in 2000 were \$7.2 million, up from \$5.7 million in 1999.

DAIRY HIGHLIGHTS

Florida dairies produced 2.46 billion pounds of milk in 2000. This was up from 2.40 billion pounds produced during 1999. In 2000, the milkfat content was 3.60 percent, the highest level since 1983. Annual production per cow was a record high 15,675 pounds, up from 15,177 pounds in 1999.

An average of 157,000 milk cows were on Florida farms and commercial dairies in 2000, down 1,000 head from 1999. Florida ranked 14th among States in average number of milk cows, and was 15th in total annual milk produced.

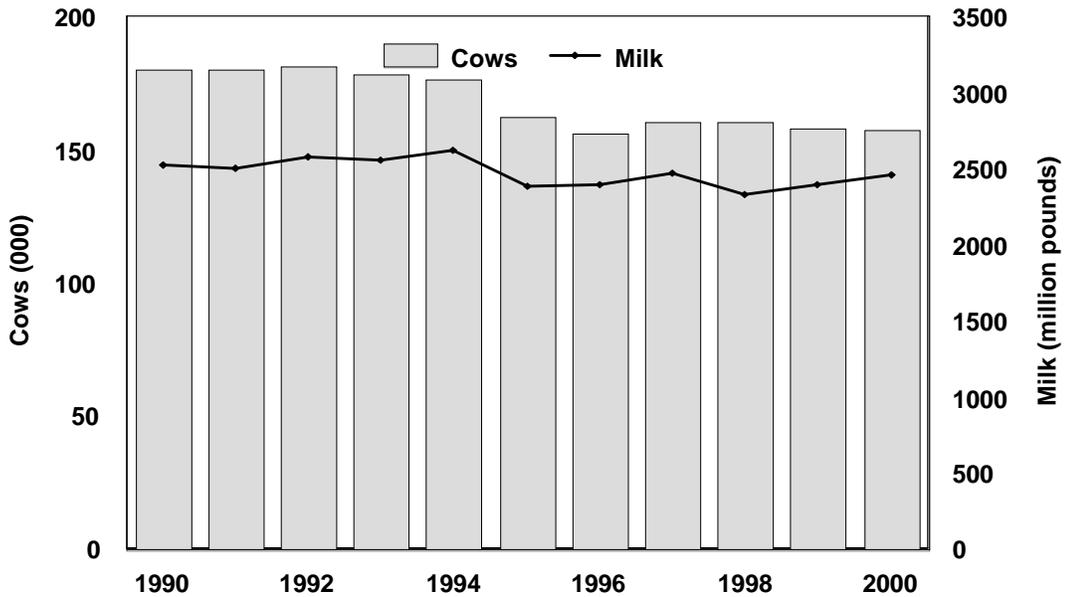

Cash receipts from marketings of Florida milk in 2000 totaled \$384 million, \$29 million less than 1999

Total United States milk production increased to 167.7 billion pounds in 2000, up from 162.7 billion pounds in 1999. The average number of milk cows on U.S. farms and dairies during 2000 was 9,210,000, a 54,000 increase from 1999. The average annual milk production per cow reached 18,204 pounds. Milkfat averaged 3.68 percent in 2000, the highest level since 1992.

Nationwide, cash receipts from marketings of milk during 2000 totaled \$20.6 billion, down from \$23.2 billion from 1999. Average returns were \$12.40 per hundred-weight, \$1.98 less than the 1999 average.

The price of replacement milk cows continued to increase. It reached \$1,350 per head in October 2000.

MILK COW COUNTY SUMMARY

Okeechobee County continues to be the leading county in Florida with over 2.3 times as many dairy cows as any other county.

The four leading counties (Okeechobee, Gilchrist, Lafayette and Levy) accounted for over 43 percent of the dairy cows in Florida.

BEEF HIGHLIGHTS

All cattle and calves on Florida farms and ranches as of January 1, 2001 including dairy cattle, totaled 1,800,000 head, down 30,000 head from 2000. Beef cows in Florida were 975,000 head, down from 994,000 in 2000. Florida ranked 12th in beef cows nationally and third among States east of the Mississippi River.

Calves born during 2000 totaled 950,000, down 10,000 head from 1999. Calves marketed from Florida in 2000 were 711,000 head. Almost 75 percent of the calf crop of Florida was marketed, the largest percentage of calves of all States.

^{1/} An operation is any place having one or more head of beef cows on hand at any time during the year.

^{2/} Combined with other size groups.

POULTRY HIGHLIGHTS

FLORIDA

The total value of Florida chicken and egg production in 2000 was \$336 million, down from \$354 million in 1999. Egg production was valued at \$108 million, slightly up from 1999. The average annual price for eggs (hatching and table eggs combined) was 48.2 cents per dozen, 3.7 cents per dozen more than in 1999.

The value of broilers produced in Florida during 2000 totaled \$227 million, down from \$246 million of a year earlier. The average annual price of broilers in 2000 was 35.0 cents per pound, a decrease of 3.0 cents per pound from 1999.

The value of sales from Other Chickens was \$675,000. This includes sales of spent hens and roosters.

Hens and pullets of laying age on farms on December 1, 2000, were 10.7 million birds, of which 5.3 million were 1 year and older. This compares to 10.6 million and 5.7 million birds, respectively, in 1999. Pullets not yet of laying age numbered 2.0 million, down from 2.1 million pullets in 1999.

Florida broiler production in 2000 totaled 647.5 million pounds, down slightly from 1999. Broilers raised in Florida during 2000 totaled 120 million birds, down from 122 million birds in 1999.

Florida egg production, in the production year of December 1, 1999 to November 30, 2000, was 2,723 million eggs. This was a decrease from the previous year's production of 2,776 million eggs.

Commercial hatcheries produced 124.4 million straight run chicks in 2000, down from 127.9 million in 1999. Broiler-type chicks accounted for 112.5 million chicks, and egg-type chicks were 11.9 million.

UNITED STATES

Layer numbers during 2000 averaged 328 million, up two percent from the year earlier.

The combined value of production from broilers, eggs, turkeys and the value of sales from chickens in 2000, was \$21.2 billion, down from the \$22.4 billion in 1999. Of the combined total, 67 percent was from broilers, 20 percent from eggs, 13 percent from turkeys, and less than one percent from other chickens.

Value of egg production in 2000 was \$4.35 billion, up from \$4.29 billion in 1999. Egg production totaled 84.4 billion eggs, up two percent from 1999. Table egg production at 69.8 billion eggs, increased four percent from 1999. Hatching egg production was 12.9 billion eggs, an increase of four percent. The value of broilers produced during 2000 was \$14.0 billion, down from 1999. The total number of broilers produced in 2000 was 8.26 billion, up one percent from 1999. The total amount of live weight broilers produced in 2000 was 41.5 billion pounds, up two percent from 1999.

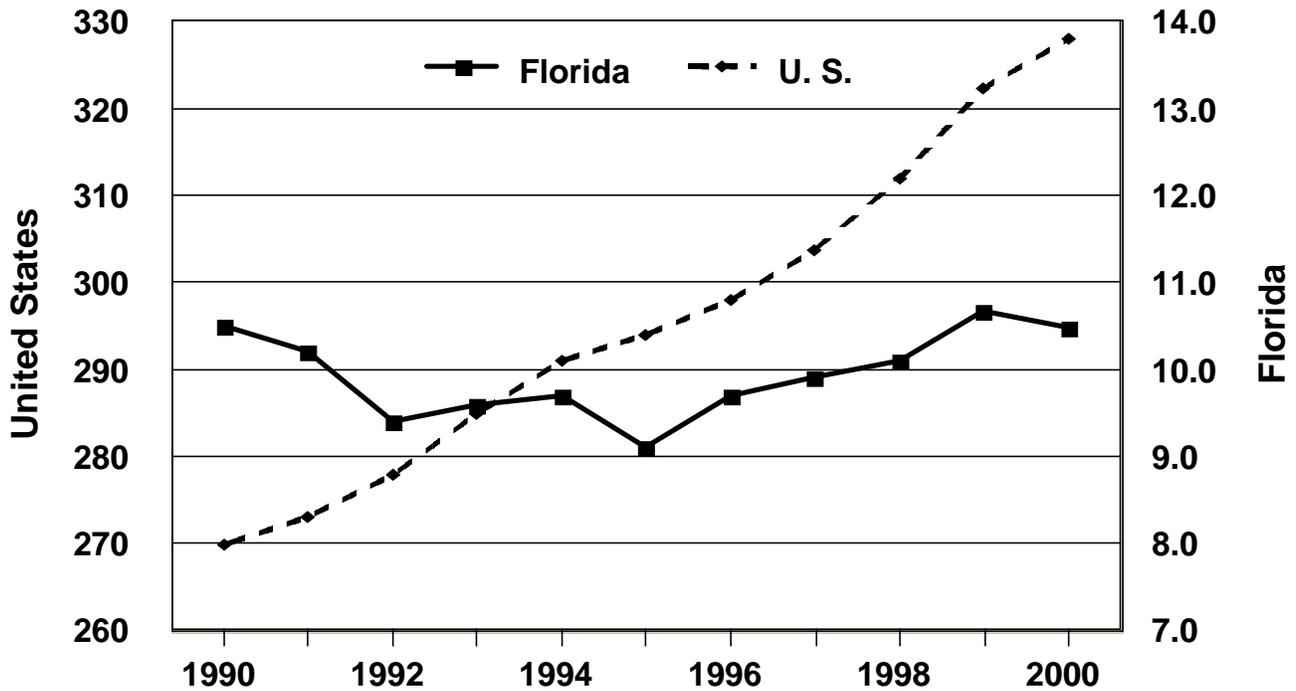

The value of turkeys produced during 2000 was \$2.8 billion, up slightly from the \$2.8 billion the previous year. Turkey production in 2000 was 7.0 billion pounds live weight, compared with 6.9 billion pounds in 1999.

The value of sales from other chickens (excluding broilers) in 2000 was \$64.7 million, down six percent from a year ago.

^{2/} Inventory as of January 1 prior to 1965 and as of December 1 preceding year beginning in 1965.

HONEY

FLORIDA: Honey production in 2000 was 24,360,000 pounds, up five percent from 1999. Florida ranked fourth in production behind California, North Dakota and South Dakota. There were 232,000 colonies in Florida in 2000 with an average honey yield of 105 pounds per colony, three pounds per colony more than in 1999.

Producers received an average of 54 cents per pound for the honey, up one cent per pound from the previous year. The value of Florida honey production in 2000 was \$13.2 million, up from the 1999 value of \$12.3 million.

UNITED STATES: Honey production in 2000 from producers with five or more colonies totaled 221 million pounds, up 8 percent from 1999. There were 2.63 million colonies producing honey in 2000, down two percent from 1999. Yield per colony averaged 83.9 pounds, up 7.5

pounds from the 76.4 pounds in 1999. Colonies which produced honey in more than one State were counted in each State so yields per colony may be understated. Colonies were not counted if honey was not harvested. Producer honey stocks were 86.2 million pounds on December 15, 2000, up nine percent from a year earlier.

Prices for the 2000 crop averaged a 59.4 cents per pound, down one percent from 60.1 cents in 1999. Prices are based on retail sales by producers and sales to private processors and co-ops. At the State level, prices reflect the portions of honey sold through retail, co-op and private channels. At the U.S. level, prices for each color are derived by weighting quantities sold for each marketing channel. Co-op and private prices were lower for all color classes except 'Other Honey' in 2000.

CATFISH

FLORIDA

There were 38 catfish operations in Florida on January 1, 2001. Total water surface area was 680 acres, an increase of 290 acres from 2000. Most of the acreage was for foodsize fish (320 acres) and fingerlings (50 acres). Total sales in Florida in 2000 were \$1,296,000. The majority of the sales (85 percent) from the operation were to processors.

UNITED STATES

Catfish growers in the major producing States had sales of 501 million dollars during 2000, up two percent from the previous year. The top four States, Mississippi, Alabama, and Arkansas, and Louisiana accounted for 96 percent of the U.S. total sales. Nationwide sales of all foodsize fish increased one percent from 1999 to 469 million dollars. Fingerlings and fry sales totaled 23.4 million dollars, an increase of 24 percent from 1999. Sales of stockers totaled 7.65 million dollars in 2000, more than double the 3.65 million dollars sold the previous year.

By point of first sale, direct sales to processors accounted for 95 percent of the total sales of foodsize fish while 87 percent of the stocker sales were to other producers. The remainder were sold for recreational use, to live haulers, for retail, government, or other uses.

The water surface acres being used for catfish production as of January 1, 2001, totaled 190,320 acres, up two percent from a year earlier. Of the total acres, 6,085 are to be renovated during the period of January 1, 2001 to June 30, 2001. An additional 5,065 acres are under construction or expected to be constructed and in use by July 1, 2001. During the period of July 1, 2000 through December 31, 2000 4,510 acres were taken out of production. As of January 1, 2001, 156,855 acres were being used for foodfish production, 24,580 acres were being used for fingerling production, and 5,615 acres were being used for broodfish.

Catfish producers had 1.33 million broodfish on hand January 1, 2001, down 4 percent from January 1, 2000. Large foodsize fish (over 3 pounds per fish) on hand totaled 6.87 million on January 1, 2001, up 18 percent in comparable states from a year ago. The number of medium foodsize (1.50 pounds to 3 pounds per fish) increased 14 percent to 87.9 million, and small foodsize fish (0.75 pound to 1.50 pounds per fish) numbers increased 20 percent to 240 million.

The number of large stockers (over 180 pounds to 750 pounds per 1000 fish) on hand January 1, 2001, at 349 million, were down two percent from the previous year. Small stocker over 60 pounds to 180 pounds per 1000 fish) numbers increased 4 percent to 450 million. There were 1.02 billion fingerlings on hand January 1, 2001, down three percent from January 1, 2000.

^{2/} Includes CA, GA, KS, KY, NY, OK, SC, TN, and TX.

CONFIDENTIALITY OF COLLECTED DATA

All information collected from individual agricultural producers is held strictly confidential. Data provided by individual producers or other agricultural firms are used only to compile and publish statistics at the county, State, and national levels. Statistics at the county and

State level are not published if they will potentially disclose information about an individual or operation. In addition, all names and addresses obtained by this office are held confidential.

RELEASE DISTRIBUTION POLICY

Florida Agricultural Statistics Service (FASS) publications are provided free of charge to all Florida agricultural producers and other respondents to FASS surveys. Also entitled to free FASS publications are news media that use agricultural statistics in their publications, cooperating State agencies, and other USDA agencies that have an

essential need for this information. Publications picked up at the FASS office will be provided at no charge.

Other persons or entities will be assessed a nominal charge to receive individual publications or to be placed on distribution list for future FASS publications.

NASS MISSION

To serve the United States, its agriculture,
and its rural communities by providing meaningful,
accurate, and objective statistical information
and services.
